

COMPANY PROFILE

Nutec Enterprises

(AUTOMATION DIVISION)

Full range of Building Automation Systems
Installation & Commissioning

Operating Equipment for Automatic Gates and Doors from:

FAAC Italy
An ISO 9001 Certified Company

NUTEC-Enterprises

Automations are a leading supplier of operating equipment for Automatic pedestrian doors.

We offer competent, professional service in the field of door automation.

All our equipment has been designed and manufactured by

FAAC, Italy. Their products are designed and developed by the needs of customers, after years of research for problem free, smooth operation. Subsequently, they have earned the reputation as the higher end, most reliable manufacturers in the segment.

We are proud to be the only FAAC automatic Door & Gate systems supplier in Doha Qatar.

Nutec not only supply but install FAAC automatic door equipment, for residential & commercial establishments with service contract options.

Vehicle Access Control Systems

Wide range of readers and cards to satisfy all requirements.

Simply automatic.

ACCESS AUTOMATION

**Security combined
with automation:
Nutec Swing &
Sliding Gates**

NUTEC-Enterprises Automations design, supply & install
Fully functional Automatic Gates

Swing gates open with a rotation around a fulcrum, just like an ordinary door.

When the gate's doors open, they usually turn inward thus requiring specific internal space.

Our experts measure the dimensions and the approximate weight of the leaf gate, the sturdiness of the post and the leaf gate & the material it is made of in order to choose the ideal FAAC automation system.

The automations are usually powered by the 230V supply and 24Vdc, which, thanks to the low voltage alimentation, guarantees a safer functioning. Moreover, the 24Vdc power supply is recommended when an intensive use is necessary, which is usually requested for commercial and industrial applications.

■ 412

The sliding gate is functional where saving space is a concern. It allows you to enter your vehicle without stress and adapt to surfaces of limited depth. Different FAAC Sliding Gate Systems are designed for smooth, remote operation of Gates with weights ranging from 400kg to 3.5 tonnes

SPACE SAVER PARK

automatic

**800PARK**

DC automatic park space saver.

800PARKM

Manual park space saver without motor.

800PARKXL

NEW

DC automatic park space saver plus.

800PARKMXL

NEW

Manual park space saver plus without motor.

Accessories

750D780M
Electronic control unit for a single PARK parking space saver with built-in radio receiver (expandable up to 4 units)

750EXP780M
Single expansion module for D780M

Technical features

	PARK/XL
Power supply	230 V AC (50 - 60 Hz)
Motor power supply	18 V DC
Absorption	1,6 A
Absorbed power	30 W
Operating time	5 sec.
Duty cycle	100 %
Resistance to weight	2,5 kg/cm ²
Operating temperature	-20° C ÷ +55° C
Motor thermal protection	-
Degree of protection	IP 54

**Features:**

- residential, industrial and public use
- low voltage DC motor
- opening time 5 seconds
- radio-controlled operation
- manual release

Pros:

- fast opening
- ideal to save the park space
- obstacle detection and crush prevention
